

JEFFERSON ONUNWA

FRONTEND ENGINEER

Port Harcourt, Nigeria. | +234 (0) 8155150691 | jeffersiconunwa@gmail.com

linkedin.com/in/jefferson-onunwa | github.com/Am-Jheffy | https://jefferson-no.netlify.app

PROFESSIONAL SUMMARY

Results-driven Frontend Engineer and UI Architect specializing in building highly scalable, type-safe client systems and enterprise B2B interfaces. Proven expertise in React, TypeScript, and modern styling architectures like Tailwind CSS and Framer Motion. Adept at driving project execution through technical mentorship, cross-functional collaboration, and agile problem-solving. Demonstrated track record of integrating AI workflows and optimizing frontend architectures for peak performance, accessibility, and minimal technical debt.

TECHNICAL SKILLS & COMPETENCIES

Frontend Architecture: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion, Bootstrap, DOM Manipulation.

State & Data Management: Redux, TanStack Table, RESTful API Integration, Asynchronous Data Flows, Global State Orchestration.

AI & Emerging Tech: LLM Integrations, Prompt Engineering, AI Automation, Chatbot Architecture.

Engineering Leadership: Technical Mentorship, Cross-Functional Collaboration, Agile Execution, Architecture Planning, Code Review.

Development Practices: Single Page Application (SPA) Development, Mobile-First Design, Cross-Browser Compatibility, Performance Optimization, Git / GitHub Version Control.

PROFESSIONAL EXPERIENCE

Frontend Engineer Jan 2026 – Present
AxiomVault AI

Leading frontend execution and team sprint cycles for advanced B2B SaaS platforms. Architecting high-density data visualizations and anomaly detection interfaces, ensuring type-safety and predictable state management across enterprise workflows. Driving architectural planning and providing technical mentorship to optimize UI component delivery and reduce audit case review times.

Financial Operations & ERP Specialist Oct 2025 – May 2026
PacknPay International Limited

Managed financial operations and complex data reconciliations using Odoo and Zoho ERP. This deep fluency in enterprise financial systems and cost control directly informs strategic business decisions and how I architect data-heavy dashboards for AxiomVault.

Frontend Web Developer Apr 2023 – Feb 2024 | Awka, Nigeria
Premium ESOWP Limited

Engineered and successfully deployed highly scalable corporate and institutional web platforms. Built and maintained 10 responsive enterprise websites using HTML5, CSS3, and modern JavaScript. Refactored legacy codebases to modern standards, accelerating production workflows to generate export-ready templates, reducing production time from 3 hours to 30 minutes across 200 outputs.

Independent Frontend Developer

Oct 2022 – Mar 2023

Freelance

Managed end-to-end client-side architecture for independent contracts, reducing application load times by 30% through performance optimization techniques, dynamic data handling, and RESTful API integrations. Delivered highly responsive mobile-first layouts and accessible user interfaces.

Frontend Developer Intern

2021 – 2022

DigitalNotion Systems

Established a foundational mastery of client-side web development. Built dynamic web applications and mobile-first responsive layouts. Enhanced user experience through rigorous usability testing, iterative design improvements, and thorough cross-device compatibility debugging.

ACADEMIC FOUNDATION & SERVICE

Bachelor of Science, Mathematics

Oct 2018 – Apr 2023 | Awka, Nigeria

Nnamdi Azikiwe University

Coursework: Discrete Mathematics, Algorithms, Graph Theory, Boolean Algebra, Linear Algebra, and Optimization.

Certificate of National Service

Apr 2024 – Mar 2025

National Youth Service Corps (NYSC)

Port Harcourt, Nigeria

Successfully completed mandatory national service, demonstrating civic commitment and operational readiness for corporate employment in the Nigerian tech sector.

FEATURED PROJECTS

**AI Fraud Detection Dashboard (AxiomVault) **

Architected the frontend interface for an enterprise AI fraud detection system. Engineered data visualization components to monitor anomalies in real-time, handling complex financial auditing workflows with predictable global state orchestration.

**SwiftMeal Logistics Platform **

Engineered an advanced package and delivery tracking portal. Implemented strict asynchronous lifecycle state handling and optimized data caching mechanisms to render fluid, live-updating shipment milestones and route maps on a unified responsive dashboard.

**Beauty Enterprise E-Commerce Architecture (Active Build) **

Architecting a modern commercial interface for a personal beauty brand featuring robust global state management, complex dynamic product filtering arrays, and responsive client-side shopping checkout architectures. Ensuring fluid user experiences through optimized component lifecycles.

Commercial Institutional Platforms

Engineered multiple production-grade platforms serving diverse institutional and corporate sectors. Developed highly scalable interfaces and robust routing for Arch Angel Gabriel S.S, St. Mary's College, Gray Mata Solicitors, Switchtech Energy, etc. Ensured strict cross-browser compatibility, SEO optimization, and flawless mobile-first responsiveness across all deployments.

TECHNICAL ACCOLADES & CERTIFICATIONS

Software Development Scholar: NITDA 3MTT

1st Place: Afriment Engineering Competition

Certified Frontend Developer: DigitalNotion Systems, Awka.

Verified: Introduction to Cybersecurity: Cisco Networking Academy
